-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

It is noted that when an amendment is considered non-responsive the entire amendment is non-responsive. In response to the notice of non-compliant amendment, applicant only resubmitted claims. Therefore, the claims have been considered while the amendments to the drawings and the specification have not been considered since they were part of the non-responsive amendment and not re-submitted.

#### ***Drawings***

1. The drawings are objected to because in Figures 2, 3, 4, and 5, item "15" appears to be pointing at something different in each of these Figures. Also, in Figures 2, 3, 4, and 5, it is not clear what item "7" is pointing at. Finally, in Figure 5, item "9" and it's corresponding reference line should be deleted since the opening is not shown. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet"

pursuant to 37 CFR 1.121(d). If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

2. The abstract of the disclosure is objected to because there are numerous occasions that the letters "o" and "e" are missing from words. The abstract must be reviewed and the missing letters replaced (a copy of the abstract as it is in the file is attached at the end of this Office action). Correction is required. See MPEP § 608.01(b).

3. The disclosure is objected to because of the following informalities: There are numerous occasions that the letters "o" and "e" are missing from words. The entire specification must be reviewed and the missing letters replaced (a copy of the specification as it is in the file is attached at the end of this Office action). Also, the legal term "said" occurs numerous times in the specification. This term is to be used only in the claims. For example, on line 7 of the third full paragraph of the Detailed Description of the Invention section, the phrase "from said conventional beverage container" should be replaced with "from the conventional beverage container".

Appropriate correction is required.

### ***Claim Objections***

4. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims

are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claim 1 has been renumbered 4.

***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 4 is rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are replete with indefinite and functional or operational language. The structure that goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device.

It is noted that the current claim has no structure disclosed. The term structure is referring to the pieces of the sharpener that when combined form the pencil sharpener. For example, the pencil sharpener incorporates a hollow cylinder comprising a central hole, a pencil sharpener located inside the hollow cylinder and in communication with the central hole, and the radial wall of the hollow cylinder incorporates threads. The problem the sharpener combination solves belongs in the specification and is not proper for the claims. Only structure to the combination is proper for the claims.

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3724

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claim 4 is rejected, as best understood, under 35 U.S.C. 102(b) as being anticipated by Kent (3,083,691).

Kent discloses the same invention including an office product capable of threadably fitting on a plastic beverage container that sharpens pencils (Fig. 1).

### ***Conclusion***

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Prone whose telephone number is (571) 272-4513. The examiner can normally be reached on 7:30-5:00, Mon - (every other) Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan N. Shoap can be reached on (571) 272-4514. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
